PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience designing and delivering scalable software solutions across web development, data engineering, and artificial intelligence. Skilled in building production grade platforms, RESTful APIs, and automated workflows, with a growing focus on AI and data driven applications. Comfortable working across the full stack and across borders, having contributed to multi-regional platforms serving users across Europe and Africa.

PROFESSIONAL EXPERIENCE

Back End Engineer

Primini – Kram, Tunis, Tunisia | November 2025 – August 2026

- Developed and maintained Primini, a price comparison platform operating across **Tunisia, Morocco, and Congo**, by developing scalable **MongoDB**-based scraping schemas to onboard new e-commerce stores and expand product coverage. Automated deployment and monitoring of distributed scraping services using **SSH, PM2**, and custom scripts, while troubleshooting and updating outdated schemas to improve data quality, accuracy, and operational reliability.

Full Stack Engineer

Magic Prices – Kram, Tunis, Tunisia | November 2024 – October 2025

- Developed and enhanced Magic Prices, a multi-regional price comparison platform serving **France, Italy, and the United Kingdom**, by building performant web applications with **Next.js** and administrative tools with **Angular** and **Node.js**. Designed and maintained RESTful APIs using **JavaScript** for frontend-backend integration, while creating **n8n** automation workflows to automate and streamline operations.

Computer Vision / Video Analytics Developer Intern

QNB Banking – Urbain Nord Center - Tunis, Tunisia | February 2024 – July 2024

- Developed **YOLO**-based object and face detection plugins for **Milestone XProtect** using **Python, Roboflow**, and **NVIDIA CUDA**. Dockerized detection solutions for red-zone breaches, face detection, and lost-object identification.

QA Tester / Python Developer Intern

Capgemini – Elgazala Technopark, Tunis, Tunisia | July 2023 – September 2023

- Developed **Python/Tkinter** automation tools to verify and configure **AUTOSAR** Communication Stack layers, including **CAN, CanIf, COM, PduR, and EcuC**. Automated **Excel/XDM** validation and reporting, reducing manual configuration and consistency checks.

SKILLS

ARTIFICIAL INTELLIGENCE	Python, R, Roboflow, PyTorch, TensorFlow, CNN, OpenCV, NLP
DATABASES	MongoDB, Firebase, MySQL, Microsoft Access, SQLAlchemy, SQLite
WEB DEVELOPMENT	Nodejs, Nextjs, Reactjs, Flask, Django, Angular, Javascript, Typescript
MOBILE DEVELOPMENT	Flutter, Provider, BLoC
DEVOPS TOOLS	Docker, Kubernetes, n8n, PM2, SSH
BUSINESS INTELLIGENCE	Power BI, Microsoft Dynamics, SSIS, SSAS, SSRS, Microsoft AL
COLLABORATION TOOLS	Git, Github, Gitlab, Jira

EDUCATION

Engineering Degree in Software Development

Higher Institute of Computer Science – Ariana, Tunisia | 2021 – 2024

Bachelor in Computer Science

Higher Institute of Computer Science – Ariana, Tunisia | 2018 – 2021
